

From collection **BEVEL**

BEVEL bench - 150 cm wide with a wooden seat and a frame made of architectural concrete.

The LBE140.02 model has no backrest.

When designing the BEVEL collection, we wanted to fully exploit the properties of concrete. Openwork, bevels, narrowing, variable cross-section - the use of concrete allowed us to create spatial structural elements, visually light while maintaining full durability and functionality. BEVEL stands for expressive furniture for urban spaces.
