

Four-position stand up bench made of steel and wood.

It is an element of small architecture serving the need to "sit down" and have a short rest in places where there is not enough space to place a classic bench. Stand up benches are dedicated to various groups of people, including those whom have trouble getting up and down from low seats.

MATERIALS

WOOD	SAPELI	IROKO	ASH
			
STEEL	POWDER COATED STEEL	STAINLESS STEEL
