

W' bench - 124 cm wide with a wooden seat and a steel frame.

The LWW128.00 model has no backrest.

The optical delicacy of the structure and the simple form of the benches from the 'W' collection guarantee the possibility of integrating them into spaces of any character, from a historic park to a modern city square. The original structure made of a thick-walled, thin tube gives the benches lightness, while maintaining stability and strength.
