

From collection INTELI

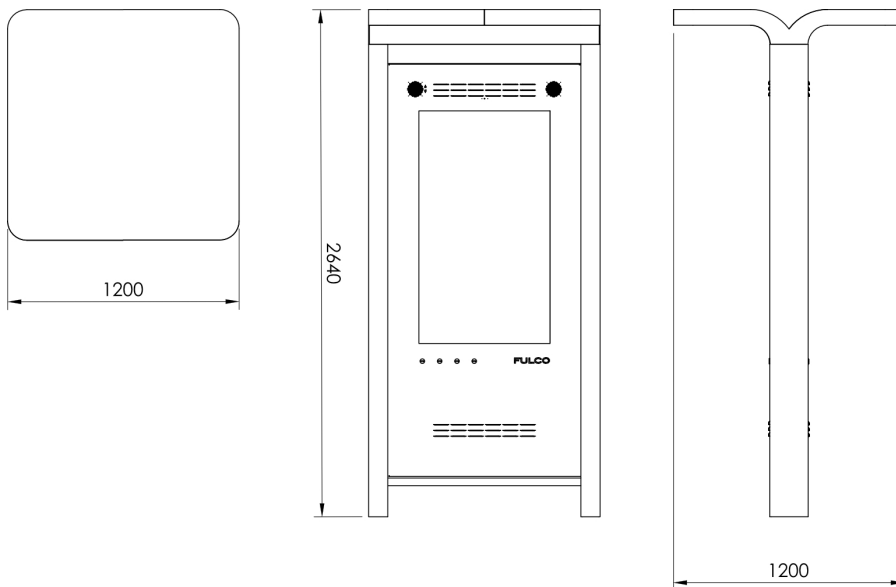

INTELI information kiosk made of steel and glass.

The RIT002.00 model has two multimedia passenger information boards with LED touch screens, USB ports for charging mobile devices, sound system, monitoring cameras, WiFi hotspot and a tight and vandal-proof housing.

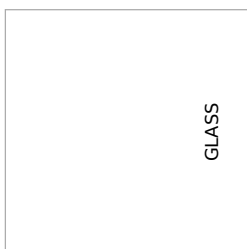

It is the perfect complement to the modern INTELI series shelters.

INTELI is a collection of one of the most modern shelters in the world. The modular design allows for individual configuration, and a long list of additional equipment makes INTELI a good choice for most projects.
